

GRAMPOND WITH CREED SCHOOL

Week beginning 22nd April 2024

What better way to make the most of the sunshine this week and appreciate the awe and wonder of our school grounds and local area to support this half-term's science learning. The children worked together to identify some common wild plants in a range of habitats.

This week also saw the start of the clubs for the summer term; including ballet club, running club, art club and gardening club. Keep a look out on class dojo for photos of what the children are working together to achieve during these extra-curricular activities.

Plant Identification

Grampound with Creed C of E School
Where every child flourishes, achieves and shines their light

You will have seen on class dojo that year 2, 5 and 6 are taking part in the SPEAK OUT, STAY SAFE workshops led by volunteers from the NSPCC. These workshops will be taking place on Thursday next week. If you do not wish your child to take part in the follow up survey, please return the consent form.

one Planet, our World

Grampound with Creed C of E School
Where every child flourishes, achieves and shines their light

A huge congratulations to the year 5 children who have completed their final Bikeability session this week. The feedback from the leaders of this has been hugely positive—so well done everyone!

Have a great weekend. Miss Jane

Diary Dates

April

25th April - Bikeability (Year 5)

May

Thursday 2nd May - Speak Out Stay Safe NSPCC workshops for years 2, 5 and 6

13th May - 16th May - Year 6 SATs week

20th - 22nd May - Y5&6 Residential to North Devon

This week's Attendance

Pedrevan
95.65%

Lostledan
93.75%

Kwilkyn
97.12%

This week's Awards

Pedrevan

Elijah for looking after his
siblings when they started
their first day in Nursery

Maisie for great knowledge
Lostledan

wildflower search in Science

Kwilky

Mabel for amazing persuasive writing
during English lessons

Wraparound Care

Contact Information

Sickness and Absences

Please be reminded that all absences must be reported by ringing the school office on 01726 882644. If your child has a cough or a cold they should still come to school unless you feel they are too unwell to be here; in which case they should stay at home and rest until they are well enough to return.

Important Notice

Important Notice! Any clubs or organisations who we advertise through our Newsletter and are not affiliated with Grampound with Creed School are reminded that they must have the necessary insurance, qualifications and DBS checks in place. This is to ensure the welfare of the children and is not the responsibility of Grampound with Creed School.

School Uniform

If you are in need of some uniform we have a range of pre-loved items available for a donation. Please contact Mrs Warren on 07712262471 to discuss any items you need.

School Collection

Please ensure that the school is informed before 2.45pm if anyone other than parents are collecting your child/ren.

If you have a number of people who pick up, please contact the office to ensure that we know who they are and that they have permission on that day.

Autumn Term After School Clubs

Mondays - Mrs Grubb - Ballet Club

Mondays - Miss Evens - Recorder Club

Tuesdays - Mrs Martin - Gardening Club (Rec/Y1/Y2)

Thursdays - Mr Keyes - Running Club

Fridays - Argyle - Football Club

INSET Days 2023/2024

22nd, 23rd and 24th July 2024

Next Academic Year - 3rd Sept 2024,
22nd Nov 2024, 6th & 7th Jan 2025
and 23rd July 2025

Residential 2023/2024

20th - 22nd May Y5&6 North Devon

1st - 3rd July Y3&4 Porthpean

FOOTBALL SATURDAY MORNINGS

Guidance on infection prevention and control in schools and childcare settings[#]

Updated: November 2022

Remember you can help prevent the spread of infections by checking children have had their routine immunisations, maintaining a clean environment, and ensuring good personal hygiene (among staff and children), especially ensuring regular hand washing.

UK Health Security Agency (UKHSA) Health Protection Team

For outbreaks or advice please contact the UKHSA South West Centre HPT on 0300 3038162 or email SWHPT@UKHSA.GOV.UK

| Rashes and skin infections | Recommended period to be kept away from school or childcare setting | Comments |
|--|---|---|
| Chickenpox and shingles | Five days from onset of rash and until all lesions have crusted over | Advise pregnant women to contact their GP if exposed and unsure if they have previously been infected |
| Cold Sores (Herpes Simplex) | None | Cold sores remain contagious until they are completely healed. They are generally mild and heal without treatment (7-10 days). Avoid kissing and close skin to skin contact of the sore - Don't share items that come into contact with the affected areas (cutlery / lip balm) |
| Hand, Foot and Mouth | None | Contact your UKHSA HPT if many children are affected. Exclusion may be considered in some circumstances |
| Impetigo | Until lesions are crusted over or 48 hours after antibiotic treatment has been started | Impetigo is highly infectious, and it is spread by direct contact. Antibiotic treatment speeds healing and reduces the infectious period |
| Measles* | Excluded as soon as measles is suspected until five days after the onset of rash | Contact UKHSA HPT as soon as measles cases are notified to the school. Preventable by immunisation (MMR x2 doses). Promote MMR for all pupils and staff. Advise staff contacts who are pregnant, unimmunised or have weakened immune systems to contact their GP immediately. |
| Molluscum contagiosum | None | A self-limiting condition. The lesions will resolve over time without any treatment |
| Parvovirus or Fifth disease (slapped cheek) | None (once rash has developed) | Request parents notify the school so that pregnant contacts can be advised to consult GP or midwife following exposure |
| Panton-Valentine Leucocidin (PVL) | None if they feel well | Individuals should not take part in contact sports or use communal gym equipment until their skin lesion has totally healed. For further guidance contact UKHSA HPT |
| Ringworm (incl foot ringworm - athletes' foot) | Exclusion is not required for individuals with athlete's foot. Individuals with skin and scalp ringworm can return to school once they have started treatment with anti-fungal agents | Treatment is required |
| Rubella (German Measles)* | Six days from onset of rash | Preventable by immunisation (MMR x2 doses). See UKHSA document above. Advise pregnant staff contacts to seek prompt advice from their GP |
| Scabies | Until after the first treatment has been completed | Household and close contacts require treatment at the same time. In the event of 2 or more suspected cases, contact UKHSA HPT |
| Scarlet Fever* | Exclude until 24 hours of appropriate antibiotic treatment complete | A person is infected for 2-3 weeks if antibiotics are not administered. In the event of 2 or more suspected cases, contact UKHSA HPT |
| Warts and Verrucas | None | Verrucas should be covered in swimming pools, gyms and changing rooms |

| Respiratory Infections | Recommended period to be kept away from school or childcare setting | Comments |
|-----------------------------|---|---|
| COVID-19 | Until temperature has resolved and they are well enough. If tested positive, child should stay home for 3 days. | Report outbreaks in line with local policy |
| Flu (Influenza) | Until recovered | Report outbreaks to your local UKHSA HPT |
| Tuberculosis* | When diagnosed with TB a treatment team will assess whether other people are at risk of infection and require screening | Requires prolonged close contact to spread. Only pulmonary TB is infectious to others. Always consult your local UKHSA HPT before disseminating information to staff/carers |
| Whooping Cough* (Pertussis) | Until they have had 48 hours of appropriate antibiotic treatment and feel well enough to return. OR after 21 days from onset of illness if no antibiotic treatment has been taken | Preventable by vaccination. After treatment, non-infectious coughing may continue for many weeks. Your UKHSA HPT will organise any contact tracing necessary |

Outbreak Action Cards and Poster Centre
bit.ly/OutbreakActionCards

| Diarrhoea and vomiting illness | Recommended period to be kept away from school or childcare setting | Comments |
|---|--|---|
| Infectious Diarrhoea and Vomiting (Gastroenteritis) Bacteria Campylobacter Salmonella Shigella (bacillary dysentery) E.coli O157 Viruses Rotavirus Small round structured viruses (e.g. Norovirus or Winter Vomiting Disease) Parasites Cryptosporidium Giardia | Should be regarded as very infectious and must be kept away from school until the diarrhoea and vomiting has stopped for at least 48 hours They must have been passing normal stools for at least 48 hours Some Gastro infections (like E.coli O157) require microbiology clearance and UKHSA will advise on these | An infection in the gut causing diarrhoea and vomiting (gastroenteritis) can be easily passed to others. Good hygiene, in particular handwashing and environmental cleaning, are important to minimise any danger of spread. Exclusion from swimming is advisable for two weeks after the diarrhoea has settled. If an outbreak occurs, consult UKHSA HPT. A diarrhoea and vomiting checklist for schools can be found in the UKHSA health protection in schools guidance (QR code above). |

| Other Infections | Recommended period to be kept away from school or childcare setting | Comments |
|---|---|--|
| Conjunctivitis (bacterial or viral) | Exclusion is not required unless they are particularly unwell | Advise parents to seek advice immediately if there is a possibility their baby has infective conjunctivitis. If an outbreak/cluster occurs, consult your UKHSA HPT |
| Diphtheria* | Exclusion is essential. Always consult with your UKHSA HPT | Preventable by vaccination. Family contacts must be excluded until cleared to return by your UKHSA HPT. UKHSA HPT will organise any contact tracing necessary |
| Glandular Fever | None | Spread is by saliva, usually through kissing or being in close contact with a carrier |
| Head Lice | None | Treatment is recommended only in cases where live lice have been seen |
| Hepatitis A* | Exclude until seven days after onset of jaundice (or seven days after symptom onset if no jaundice) | Household contacts of individuals with Hepatitis A may occasionally require exclusion from school. Contact local UKHSA HPT who will advise on any action needed |
| Hepatitis B*, C*, HIV/AIDS | None if they are well enough | Hepatitis B and C and HIV are blood borne viruses that are not infectious through casual contact. See UKHSA guidance document above |
| Meningococcal Meningitis*/ Septicemia* | Until recovered. There is no reason to exclude any siblings or other close contacts of the case from school | Meningitis ACWY and B are preventable by vaccination. Contact local UKHSA HPT who will advise on any action needed |
| Meningitis* due to other bacteria | Until recovered | Hib and Pneumococcal Meningitis are preventable by vaccination. Contact local UKHSA HPT who will advise on any action needed |
| Meningitis viral* | Until recovered There is no reason to exclude any siblings or other close contacts of the case from school | Milder illness than bacterial meningitis. |
| Mumps (paramyxoivirus)* | Exclude child for five days after onset of swelling | It is very contagious and spread in saliva, the same way as a cold or flu. Preventable by vaccination (MMR x2 doses). Promote MMR to pupils and staff |
| Worm Infestations (including hookworm, roundworm, tapeworm, threadworm, and whipworm) | None | Treatment is recommended for the child and household contacts |

Pre-school, nursery, or childminder

* denotes a notifiable disease. It is a statutory requirement that doctors report a notifiable disease to the proper officer of the local authority (for some local authorities, this may be UKHSA) In addition, you may need to inform other regulating bodies, for example Office for Standards in Education (OFSTED) or Care Quality Commission (CQC). Please follow local policy.
